COMMUNITY, AUTONOMY, AND DIVINITY SCALE – CADS (2011 English version)

Source: Guerra, V. M., & Giner-Sorolla, R. (2010). Community, Autonomy, and Divinity Scale (CADS): Development of a theory-based moral codes scale. *Journal of Cross-Cultural Psychology*, 41. 35-50.

Note: The original instructions and rating scale used in the submitted manuscript have been changed due to the difficulty some participants had in understanding them. They were as follows:

The following sentences express standards that different people may have when judging something as morally right or morally wrong. When YOU are judging something as RIGHT / WRONG, to what extent is each of the following standards important to your judgment?

Rating scale: 7-point Likert scale, ranging from 1 (*Not important at all*) to 7 (*Of the utmost importance*).

In future research we are using the version of the scale presented below.

INSTRUCTIONS: How much do the phrases below justify someone's action as right? Using the 7-point rating scale, please rate how much each thing makes an act morally RIGHT according to your judgement.
