**BARKING & HAVERING REPORT- A CASEMIX ANALYSIS OF HOSPITAL
ADMISSIONS IN SIX SPECIALTIES**
January 1999

AIM

To examine admission rates for Barking & Havering residents to six surgical specialties by first looking at elective, emergency and total workloads, then at the casemix of elective work using Healthcare Resource Groups. To compare findings to other London areas.

BACKGROUND

In a previous study for Barking & Havering Health Authority (BHHA), the South East Institute of Public Health (SEIPH) examined casemix in three specialties, namely general medicine, geriatrics and gynaecology. This led BHHA to carry out further work on the management of respiratory and cardiovascular diseases.

The study reported here was requested by the Director of Public Health to support demand management activities and negotiations with local trusts. In particular to help define clinically urgent cases for prioritisation.

The data needed for this work are the Hospital Episode Statistics (HES). These data were readily available to SEIPH as it is acting as the 'Safe Haven' for North Thames and South Thames HES data.

METHODS

Specialties

All finished consultant episodes in the following specialties were selected for the analysis:

- general surgery
- urology
- orthopaedics
- ENT
- ophthalmology
- dental surgery.

Although the main focus was elective work at sub-specialty level, elective and emergency episodes were looked at first. The sub-specialty work used version 3.0 HRGs (an advancement on the previous work for BHHA which used version 2.0). A full list of the HRG titles is given in the Appendix, which includes a description of the grouping logic taken from documentation from the National Casemix Office.

Data

Completed consultant episodes were the currency for this work, using the latest available HES data. This was the 'provisional' HES database for the financial year 1996/7, since in the Barking & Havering area the quality and completeness of data from providers were thought to be sufficiently good that the final dataset would be no different. However, it should be noted that 1996/7 data has since been cleaned further by the Department of Health, and therefore results from the 'final' dataset could differ from those reported here.

For data quality assurance, the figures for the six specialties were checked against other published sources and with information staff at BHHA and the main comparator HA. We also had access to the Department of Health's Statistics Division data quality reports for the hospital episode statistics. The data quality report for 1996/7 checked some variables at trust level (the overall number of episodes and the proportion of completed and valid diagnosis and procedure codes) and other variables at a wider geographical area.

The crucial data for this study were that all episodes got on the database as these would affect rates, and that medical coding was complete for the case mix analysis. In this study we looked for data quality levels of the following:- episodes at local hospitals were within 10% of the KP70 central statistical return, a valid primary diagnosis was present in at least 90% occasions and that when a procedure was recorded it was valid in at least 90% episodes.

The above checks suggested there were no major concerns about the data for Barking & Havering residents in this study.

Comparator areas

A single health authority and a larger area were chosen for comparing rates of admission. Because London admission rates are quite high, London rather than other urban or provincial HAs around England were considered. Considerations of data quality also influenced the choice of comparison areas.

At the time the analysis was carried out, the data quality for North Thames providers was quite patchy, with major inadequacies for some providers and overall completeness of around 80%. When calculating the admission rates for the residents of a health authority it would be difficult to eliminate the impact of providers with poor data. As a result the south London area made up of six health authorities was chosen as a comparator, since its data quality was good (90% complete). This area differed slightly from the north London authorities in its spread of underprivileged (Jarman) scores, with rather more authorities at the privileged end of the scale and fewer in the middle of the scale.

Bexley & Greenwich HA was chosen as the most suitable health authority comparator because of its socio-economic similarities with BHHA as shown by the Census. In the ONS classification they both belong to the same family group - 'Urban areas with mixed economies'. Both authorities are in outer London and contain a mixture of deprived and suburban areas.

Measures

Age-standardised admission rates were calculated based on the mid-year population estimates supplied by ONS. Admission rates were directly standardised to the population of England & Wales (mid 1996). In other words the local admission rate for each age-band was applied to the standard population, using the same method as in previous work for Barking & Havering.

It should be noted the admission rates presented are based on all finished consultant episodes. Clinical coding is done at the level of episode, which allows each episode to be assigned to a HRG and play a part in the analysis. In the text the term admission rate is used, although strictly it is the episode rate.

Measures used at the level of casemix group were average length of stay and the proportion of day cases. Some procedure specific rates were calculated, and BHHA supplied information on the length of inpatient waiting lists.

RESULTS

Data quality - clinical coding

The quality of detailed clinical data on the hospital episode database is crucial to this study as diagnosis and procedure codes are used to assign a patient to a casemix group. The percentage of episodes that could not be assigned to a HRG is an indicator of the quality of clinical coding. In the six specialties we found the numbers of ungrouped episodes overall was quite small, but it varied greatly for different types of episode (table 1). Around 98% of day cases were assigned to HRGs, and elective inpatients were also assigned with little loss of data (between 95% and 98%). The poorest clinical coding was in the non-elective work where it was only possible to assign around 80-90% of episodes to a HRG. A poorly defined principle diagnosis was almost always the reason episodes were not grouped to a HRG, ie a problem that the HRG classification system does not consider appropriate for hospital admission. Further examination showed that the diagnosis code 'Unknown and unspecified cause of morbidity' (R69X) was usually the cause for ungroupable episodes. The distribution of all types of ungroupable episodes is given in table 2, and a further table (table 3) shows those with code R69X indicating where the episode would have been grouped based on procedure alone. These investigations of episodes lost to the HRG analysis did not show any particular biases which would affect the results.

For this study the main focus was elective work, and fortunately this is where the clinical coding performed best in terms of assigning HRGs.

Although for Barking & Havering residents the number of usable episodes was high, it may not be true for comparison areas. Where the number of ungrouped cases is large and could affect the comparisons of admission rates, this is commented on in the report.

Trusts where BHHA residents are admitted

To put the study in context we looked at where BHHA residents were being treated (table 4). For

the six specialties covered, the main provider is Havering Hospitals NHS Trust, with 74% (over 20,000) finished consultant episodes per annum. Redbridge Health Care provides 13% (nearly 4000) episodes, with other trusts taking up the remaining 13% of workload for BHHA residents (table 5). From other statistical returns from these providers we know that BHHA residents make up 80% of Havering's and 35-40% of Redbridge's workload in these specialties.

Specialty admission rates

The age-specific rates for BHHA (in detail in table 6) show the contribution of each age-band to the overall age-standardised rate. For example, among elective inpatients the large proportion of ENT work on children and the relatively high proportion of ophthalmology carried out in the over 75 year olds. It also shows the heavy loads of non-elective work in general surgery and orthopaedics.

Comparison of specialty rates

Rates for BHHA were compared to Bexley & Greenwich HA (table 7). Not surprisingly, differences in non-elective rates were small and occurred in both directions. More dramatically, daycare admission rates for BHHA residents were twice as high in urology and ophthalmology and around 60% higher in ENT. Differences in elective inpatient admission rates compensated the daycare results with lower rates in ophthalmology, but elsewhere reinforced the pattern of higher rates in ENT (70% higher) and also in orthopaedics (60% higher than Bexley & Greenwich).

Differences in HRG admission rates

We looked at differences in more detail at sub-specialty level using Healthcare Related Groups. Admission rates were calculated for casemix groups and compared to both Bexley & Greenwich and London South. Commentary focusses on HRGs for Barking & Havering residents with high rates and big variations. A difference of 50% from the comparator regions was chosen arbitrarily as the threshold for the commentary, ie it was expected that differences of this magnitude would be of potential interest.

General surgery (100) - much of the workload in this specialty fell in HRGs relating to the digestive system, and also the skin. This specialty suffered from poor coding of the primary diagnosis to a greater extent than its comparators.

It was hard to establish a strong pattern as both higher and lower rates were seen for BHHA residents. The results were broadly similar for both elective inpatients and day cases. For example, there were many high rates compared to London South, but often not high compared to Bexley & Greenwich (in the list of HRGs below these are indicated by *). In contrast, some HRGs for BHHA had low rates, eg Q12, F36, F92, etc, or were absent, eg G15.

Examples of HRGs with high admission rates are:

Q11* (inpatients only)

F63 (day cases only)

J37*

J04
U07
F94 (day cases only)
J05* (inpatients only)
F95*
L39*
L43*
Q10

Urology (101) - This specialty was marked for its high rates among day cases. The day case rate for L21 was very high, and others were twice as high as the comparators, eg L30, L13, L39, L38. Similarly there were high rates among elective inpatients such as L17, L29, L43, L13, L18

A few HRG rates in urology were low or absent (L41, L98).

Orthopaedics (110) - This specialty was dominated by all elective inpatient rates being high. This pattern was not seen among the day cases where some rates were low. There was also a high rate of poor coding of primary diagnosis (U07).

Elective inpatient rates, which were high compared to both Bexley & Greenwich and London South, were:

H10
H17
H13 (but low for day cases)
H12
H19
U07
H22
H21
A07 (also for day cases)
H20 (but low for day cases)

ENT(120) - Compared to other specialties, this one was characterised by a small number of high volume HRGs. The main HRGs had high elective inpatient rates, although not always high compared to Bexley & Greenwich. For day cases, sometimes the rate was also high, eg C01, C02, and sometimes the reverse was seen with low rates, eg C24 and C22.

For elective inpatients high rates were found for:

C24
C22
C31
C32
C01
C02

Ophthalmology (130) - In this specialty some BHHA rates were quite different from Bexley & Greenwich, but more similar to London South. This was probably due to more costly practice

in Bexley & Greenwich treating these as elective inpatients rather than day cases.

Compared to London South, BHHA had higher day case rates for B05, B04 and B08.

BHHA did fewer B03 both as inpatients and day cases. The only other feature of the inpatient work was a rate of S22 that was high compared to London South and low compared to Bexley & Greenwich.

Oral surgery (140) - The dominant HRG was C14, where for BHHA residents far more were done as inpatients rather than day cases compared to London South (although figures for Bexley & Greenwich were more similar to BHHA).

Apart from this key result, BHHA also had higher elective inpatient rates for C35 and C24, and very low day case rates for C04.

Bed days saved - consequences of different rates

We next looked at the impact of BHHA practice, by comparing their bed use to what would have happened if they had same (local) length of stay, but the London South rates of admission. In calculating the number of bed days that could have been saved, the results highlight not only HRGs with different rates, but also ones with long lengths of stay. The detailed data is in tables 8-11, with summary information in table 12.

It should be noted that this is purely an arithmetic exercise that will need careful interpretation. There is nothing inherently right in a high or low rate of admission and there may be good reasons for differences in practice. The object is to raise questions relating to resource use. With this in mind, the major focus is on the possibility of reducing high numbers of inpatient days. For day cases we would be concerned at comparatively low rates.

General surgery - The problem of primary diagnosis codes being ungroupable re-emerged, as this group had the greatest potential for saving bed days, ie by reducing their volume. Not a helpful result. Beyond this, results showed some HRGs which were costly for BHHA compared to London South.

The HRGs below had greater resource (differences of over 91 days) for elective inpatients, ie with the London South rates a bed would have become free for over 3 months:

- U07 Poorly coded primary diagnosis
- Q02 Elective abdominal vascular surgery
- J04 Intermediate breast surgery >49 or with complications/comorbidities
- J37 Minor skin procedures - category 1 without complications/comorbidities
- G14 Biliary tract - major procedures >69 or with complications/comorbidities
- Q11 Varicose vein procedures
- F73 Inguinal umbilical or femoral hernia repairs >69 or with complications/comorbidities
- F34 Large intestine - major procedures without complications/comorbidities
- F31 Large intestine - complex procedures
- F11 Stomach or duodenum - complex procedures

The HRGs below had low rates and used fewer than 91 bed days for elective inpatients:

- F32 Large intestine - very major procedures
- F36 Large intestinal disorders >69 or with complications/comorbidities
- F22 Small intestine - major procedures >49 or with complications/comorbidities
- Q12 Therapeutic endovascular procedures
- Q05 Extracranial or upper limb arterial surgery
- F47 General abdominal disorders <70 without complications/comorbidities
- G15 Therapeutic pancreatic or biliary procedures
- S25 Other admissions

Results were good for day cases where greater use was made of day places for J37, F95, F63, L39. However, F35 occurred less often as a day case compared to London South.

Urology - as found before, this specialty was one where rates were high and substantial savings would have been made had the London South admission rate applied. For example, BHHA used nearly 600 more day case places for L21, and a judgement is needed on whether this is a good use of day case surgery.

Among the inpatient HRGs, a bed would have been freed for ten months had the admission rate been lower for L17 inpatients. Additional savings could have been realised for elective inpatients in L26, L27, L29, L04, L02.

In addition to L21, high levels of day case activity were seen for L30, L39, L45.

Orthopaedics - Large savings could have been achieved for elective inpatients with the London South admission rate. Little was lost or gained from the day case work.

The following HRGs used over 91 bed days more: H10, H17, H13, U07, H19, H12, H04, H21. In a counter example, at least 91 bed days were 'saved' by a low rate of admission to H02.

ENT - Again the potential savings in this specialty were for inpatients, chiefly C24 (nearly three bed years) and C22 (eleven months).

On the plus side inpatient bed days were 'saved' by HRG C54 and greater use was made of day case surgery (124 places) for C01.

Ophthalmology - Gains and losses seemed to be fairly even in this specialty and there were no notable results for inpatients. For day cases there were more B05 cases than had the London South rate applied, but B03 was under-used.

Oral surgery - The key result here was for C14, which used more inpatient bed days and made less use of day case surgery than found in the comparator areas. There was also under-use of day case surgery for C04.

Summary of bed days/ day case places 'saved' - in each of the six specialties, although the difference was quite small for ophthalmology, there was greater use of elective inpatient beds compared to admissions for London South. For general surgery, urology and, to a lesser extent,

ophthalmology there was also greater use of day case surgery. Less use was made of day case surgery in oral surgery. Table 12 summarises the overall specialty savings results.

Further analysis of selected HRGs

A small number of HRGs (table 13) were chosen for further analysis, either because of the impact of their different rates or to examine a particular procedure. The HRGs and all the procedures they contained are listed in table 14, and the procedures which dominate are summarised below.

General surgery -

- J37 92% removal of skin lesion
- Q11 100% varicose vein ligation and stripping
- F95 76% haemorrhoids
- L39 90% circumcision

Urology -

- L39 45% circumcision, 44% other operation on penis
- L21 87% diagnostic cystoscopy
- L30 53% rectal needle biopsy prostate, 46% dilation outlet female bladder

Orthopaedics -

- H10 various endoscopies of knee
- H17 many procedures, eg excision of bone
- H13 62% carpal tunnel release

ENT -

- C24 36% dissection tonsillectomy, 34% other bilateral tonsillectomy, 10% anedoidectomy
- C22 88% nasal septum and nasal polypectomy
- C01 68% insertion or removal of grommets

Ophthalmology -

- B05 47% cautery lesion of retina, and various other eye procedures

Oral surgery -

- C14 53% removal of wisdom tooth, 32% removal of other/multiple teeth

Pursuing these selected HRGs further we noted different patterns within HRGs. For example, in HRG L39 which is part of the workload of both general surgeons and urologists, the urologists treated the majority of older patients and admitted these as day cases, whereas the younger patients were shared with the general surgeons and the specialties were similar in the proportion treated as day cases (table 15). Most of these episodes took place in Havering Hospital or Redbridge Healthcare. The proportion treated as day cases varied with 88% of general surgery episodes and 91% of urology episodes in Havering Hospital compared to 68% and 87% respectively among the smaller caseload in Redbridge Healthcare (table 16).

In both orthopaedic HRGs H10 and H13 patients the age of patients was associated with the

setting for treatment with those aged over 65 more likely to have inpatient treatment (table 15).

Finally the procedures done by oral surgeons in C14 - Mouth and throat procedures category 2, were examined in relation to the work done in comparator districts (table 17). The proportions of wisdom tooth extractions (62% in Bexley & Greenwich and 50% in South London) and other/multiple extractions (25% and 39%) were similar to Barking & Havering's 53% wisdom teeth and 32% other extractions.

A summary table brings together the inpatient and day case figures for selected HRGs (table 18). It highlights the high volumes of:

- i) minor skin procedures (J37), bladder (L21) and prostate (L30) endoscopies done as day cases,
- ii) arthroscopies (H10), soft tissue/bone (H17) and hand (H13) procedures done as inpatients,
- iii) tonsillectomies/adenoidectomies (C24) and nose procedures (C22) done as inpatients,
- iv) mouth and throat procedures including tooth extractions (C14).

SUMMARY OF KEY RESULTS

Age-standardised admission rates have been calculated for Barking & Havering residents who had hospital episodes in six surgical specialties on the HES database in the year 1996/7. The work focussed particularly on elective work, for example the day case and inpatient split, and looked at the case mix using HRGs.

Data quality was examined and, as far as could be ascertained, was considered adequate for this purpose. For example 98% of elective episodes had sufficiently good medical coding to be allocated to a HRG. Comparator areas for Barking & Havering were chosen with data quality in mind.

Specialty admission rates for BHHA non-elective work are similar to the comparator areas in south London. As might have been expected among non-elective admissions differences were small and occurred in both directions. However large differences occurred in elective admissions.

Biggest differences in specialty rates were for urology and ophthalmology day case work. Elective inpatient specialty rates show some higher rates (such as ENT and orthopaedics) and a lower rate in ophthalmology which compensated for the high day case rate in this specialty. BHHA rates are slightly lower than Bexley & Greenwich in general surgery for both day cases and elective inpatients.

The table below summarises information from tables at the end of this report. It shows the five HRGs in each specialty with the overall highest elective (day case + inpatient) rates. Alongside these the five HRGs are shown with the greatest potential savings in inpatient days and day cases had the South London admission rate applied:

Specialty	HRG	Elective admission rate	HRG	Potential inpatient day savings	HRG	Potential day case savings
General surgery	J37	361	U07	425	J37	428
	Q11	119	Q02	186	F95	201
	F35	109	J04	175	F63	171
	F74	103	J37	151	L39	114
	F95	91	G14	147	F94	74
Urology	L21	462	L17	317	L21	584
	L30	82	L26	193	L30	279
	L39	69	L27	166	L39	186
	L27	67	L29	142	L45	112
	L19	60	L04	141	L20	69
Trauma & orthopaedics	H10	236	H10	510	A07	36
	H13	66	H17	226	H10	29
	H17	51	H13	194	H22	14
	H02	50	U07	169	U02	10
	H04	42	H19	166	H12	9
ENT	C24	380	C24	1018	C01	124
	C22	114	C22	336	C02	91
	C01	113	C32	65	U02	6
	C02	52	C31	62	J37	5
	C31	35	C01	31	U07	4
Ophthalmology	B02	236	B02	66	B05	226
	B05	8	B09	27	B04	79
	B03	7	B08	24	B07	23
	B07	6	S22	16	B06	13
	B01	5	B01	12	B08	13
Oral surgery	C14	236	C14	144	C44	4
	C04	8	C35	42	C07	3
	C24	7	C24	36	S25	3
	C35	6	C45	33	C17	2
	S22	5	H10	16	C34	1

While these calculations are over-simplifications of what could be achieved, they are presented as an indication of the variation in practice and a basis for further discussion.

F102 Upper dental clearance	3	16
F103 Lower dental clearance		3
F104 Extraction multiple teeth NEC	98	2079
F108 Simple extraction of tooth OS		1
F109 Simple extraction of tooth NOS	1	52
F115 Endosseous implant into jaw	4	16
F121 Apicectomy of tooth	12	125
F122 Root canal therapy to tooth		1
F128 Surgery on apex of tooth OS	1	3
F129 Surgery on apex of tooth NOS		1
F131 Full restoration tooth crown		1
F133 Restoration crown of tooth NEC		1
F139 Restoration of tooth NOS	1	4
F141 Insert fixed orthodon applianc	1	5
F143 Insert orthodont appliance NEC		3
F144 Removal orthodontic appliance		2
F145 Surgical exposure of tooth	15	76
F164 Scaling of tooth		1
F168 Other operation on tooth OS		2
F181 Enucleation dental cyst of jaw	19	103
F182 Marsupialise dental lesion jaw	1	5
F188 Excision of dental lsn jaw OS	1	11
F189 Excision of dental lsn jaw NOS		4
F203 Biopsy of lesion of gingiva	1	14
F231 Excision of lesion of tongue	2	33
F241 Biopsy of lesion of tongue	2	28
F262 Excision of frenulum of tongue	2	3
F263 Incision of frenulum of tongue	3	17
F264 Freeing of adhesions of tongue		1
F265 Suture of tongue		1
F268 Other operation on tongue OS	2	7
F281 Excision of lesion of palate	5	24

Table 17: Oral Survey (140) & HRG C14 - Operative Procedure Codes*Continued*

Operative Procedure	Bexley And Greenwich	South London
F282 Destruction lesion of palate		2
F321 Biopsy of lesion of palate	2	12
F389 Extirpation mouth lesion NOS		1
F421 Biopsy of lesion of mouth NEC	2	34
F428 Other operation on mouth OS	1	4
F429 Other operation on mouth NOS		2
F453 Excis lesion sublingual gland	1	4
F481 Biopsy lesion salivary gland		12
F512 Open extr calc submandib duct	1	6
F562 Manip remove calc submand duct		1
F582 Other submandibular duct ops	1	2
S065 Exci skin lesion head/neck NEC		2
S433 Removal suture skin head neck		1
S604 Refashioning of scar		1

Version 3 HRG labels and descriptions

The following tables provide a definitive list of HRG labels and descriptions. Copies of the tables can be produced by printing the relevant pages using the Adobe Acrobat files supplied with volume 1 of the Documentation Set, or produced as an ASCII file for importing into your own document or software using the 'Dump' function provided in the Version 3 Grouper Software.

Chapter A - Nervous System

- A01 Intracranial Procedures Except Trauma - Category 1
- A02 Intracranial Procedures Except Trauma - Category 2
- A03 Intracranial Procedures Except Trauma - Category 3
- A04 Intracranial Procedures Except Trauma - Category 4
- A05 Intracranial Procedures for Trauma w cc
- A06 Intracranial Procedures for Trauma w/o cc
- A07 Intermediate Pain Procedures
- A08 Percutaneous Image Controlled Pain Procedures
- A09 Peripheral Nerve Disorders >69 or w cc
- A10 Peripheral Nerve Disorders <70 w/o cc
- A11 Neuromuscular Disorders
- A12 Disorders of Balance >69 or w cc
- A13 Disorders of Balance <70 w/o cc
- A14 Brain Tumours or Cerebral Cysts >69 or w cc
- A15 Brain Tumours or Cerebral Cysts <70 w/o cc
- A16 Cerebral Degenerations >69 or w cc
- A17 Cerebral Degenerations <70 w/o cc
- A18 Multiple Sclerosis or other CNS Demyelinating Conditions
- A19 Haemorrhagic Cerebrovascular Disorders
- A20 Transient Ischaemic Attack >69 or w cc
- A21 Transient Ischaemic Attack <70 w/o cc
- A22 Non-Transient Stroke or Cerebrovascular Accident >69 or w cc
- A23 Non-Transient Stroke or Cerebrovascular Accident <70 w/o cc
- A24 Cranial Nerve Disorders
- A25 Nervous System Infections
- A26 Encephalopathy
- A27 Headache or Migraine >69 or w cc
- A28 Headache or Migraine <70 w/o cc
- A29 Epilepsy >69 or w cc
- A30 Epilepsy <70 w/o cc

INTRODUCTION

Chapter A - Nervous System

- A31 Head Injury with Brain Injury
- A32 Head Injury without Significant Brain Injury w cc
- A33 Head Injury without Significant Brain Injury w/o cc
- A34 Miscellaneous Disorders of Nervous System
- A98 Chemotherapy with a Nervous System Primary Diagnosis
- A99 Complex Elderly with a Nervous System Primary Diagnosis

Chapter B - Eyes and Periorbita

- B01 Trabeculectomy
- B02 Phakoemulsification Cataract Extraction with Lens Implant
- B03 Other Cataract Extraction with Lens Implant
- B04 Other Ophthalmic Procedures - Category 1
- B05 Other Ophthalmic Procedures - Category 2
- B06 Other Ophthalmic Procedures - Category 3
- B07 Other Ophthalmic Procedures - Category 4
- B08 Other Ophthalmic Procedures - Category 5
- B09 Other Ophthalmic Procedures - Category 6
- B10 Major Ophthalmic Non-Surgical Admissions
- B11 Intermediate Ophthalmic Non-Surgical Admissions
- B12 Minor Ophthalmic Non-Surgical Admissions

Chapter C - Mouth, Head, Neck and Ears

- C01 Ear Procedures - Category 1
- C02 Nose Procedures - Category 1
- C04 Mouth or Throat Procedures - Category 1
- C06 Mouth, Head, Neck or Ear Diagnoses - Category 1 > 69 or w cc
- C07 Mouth, Head, Neck or Ear Diagnoses - Category 1 < 70 w/o cc
- C11 Ear Procedures - Category 2
- C12 Nose Procedures - Category 2
- C14 Mouth or Throat Procedures - Category 2
- C15 ENT Bone Procedures - Category 2
- C16 Mouth, Head, Neck or Ear Diagnoses - Category 2 > 69 or w cc
- C17 Mouth, Head, Neck or Ear Diagnoses - Category 2 < 70 w/o cc
- C21 Ear Procedures - Category 3
- C22 Nose Procedures - Category 3
- C24 Mouth or Throat Procedures - Category 3
- C25 ENT Bone Procedures - Category 3
- C26 Mouth, Head, Neck or Ear Diagnoses - Category 3 > 69 or w cc

Chapter C - Mouth, Head, Neck and Ears

- C27 Mouth, Head, Neck or Ear Diagnoses - Category 3 <70 w/o cc
- C31 Ear Procedures - Category 4
- C32 Nose Procedures - Category 4
- C34 Mouth or Throat Procedures - Category 4
- C35 ENT Bone Procedures - Category 4
- C36 Mouth, Head, Neck or Ear Diagnoses - Category 4 >69 or w cc
- C37 Mouth, Head, Neck or Ear Diagnoses - Category 4 <70 w/o cc
- C41 Ear Procedures - Category 5
- C42 Nose Procedures - Category 5
- C43 Mouth or Throat Procedures - Category 5 >69 or w cc
- C44 Mouth or Throat Procedures - Category 5 <70 w/o cc
- C45 ENT Bone Procedures - Category 5
- C54 Mouth or Throat Procedures - Category 6
- C98 Chemotherapy with a Mouth, Head, Neck or Ear Primary Diagnosis
- C99 Complex Elderly with a Mouth, Head, Neck or Ear Primary Diagnosis

Chapter D - Respiratory System

- D01 Lung Transplant
- D02 Complex Thoracic Procedures
- D03 Major Thoracic Procedures
- D04 Intermediate Thoracic Procedures w cc
- D05 Intermediate Thoracic Procedures w/o cc
- D06 Minor Thoracic Procedures
- D07 Fibreoptic Bronchoscopy
- D08 Rigid Bronchoscopy
- D09 Pulmonary Embolus - Died
- D10 Pulmonary Embolus >69 or w cc
- D11 Pulmonary Embolus <70 w/o cc
- D12 Lung Abscess-Empyema
- D13 Lobar, Atypical or Viral Pneumonia >69 or w cc
- D14 Lobar, Atypical or Viral Pneumonia <70 w/o cc
- D15 Bronchopneumonia
- D16 Bronchiectasis
- D17 Cystic Fibrosis
- D18 Pulmonary or Pleural Tuberculosis
- D19 Other Tuberculosis
- D20 Chronic Obstructive Pulmonary Disease or Bronchitis
- D21 Asthma >49 or w cc
- D22 Asthma <50 w/o cc

Chapter D - Respiratory System

- D23 Pleural Effusion or Pleurisy >69 or w cc
- D24 Pleural Effusion or Pleurisy <70 w/o cc
- D25 Respiratory Neoplasms
- D26 Fibrosis or Pneumoconiosis
- D27 Extrinsic Allergic Alveolitis or Pulmonary Eosinophilia
- D28 Granulomatous or Other Lung Disease
- D29 Inhalation Lung Injury or Foreign Body Aspiration
- D30 Pneumothorax
- D31 Sleep Disordered Breathing
- D32 Respiratory Failure
- D33 Other Respiratory Diagnoses >69 or w cc
- D34 Other Respiratory Diagnoses <70 w/o cc
- D98 Chemotherapy with a Respiratory System Primary Diagnosis
- D99 Complex Elderly with a Respiratory System Primary Diagnosis

Chapter E - Cardiac Surgery and Primary Cardiac Conditions

- E01 Heart and Lung Transplant
- E02 Heart Transplant
- E03 Cardiac Valve Procedures
- E04 Coronary Bypass
- E05 Other Cardiothoracic Procedures with Cardiopulmonary Support
- E06 Other Cardiothoracic Procedures without Cardiopulmonary Support
- E07 Pacemaker Implant for AMI, Heart Failure or Shock
- E08 Pacemaker Implant except for AMI, Heart Failure or Shock
- E09 Cardiac Pacemaker Replacement/Revision
- E10 Other Circulatory Procedures
- E11 Acute Myocardial Infarction w cc
- E12 Acute Myocardial Infarction w/o cc
- E13 Cardiac Catheterisation with Complications
- E14 Cardiac Catheterisation without Complications
- E15 Percutaneous Transluminal Coronary Angioplasty (PTCA)
- E16 Other Percutaneous Cardiac Procedures
- E17 Endocarditis
- E18 Heart Failure or Shock >69 or w cc
- E19 Heart Failure or Shock <70 w/o cc
- E20 Deep Vein Thrombosis >69 or w cc
- E21 Deep Vein Thrombosis <70 w/o cc
- E22 Coronary Atherosclerosis >69 or w cc
- E23 Coronary Atherosclerosis <70 w/o cc

Chapter E - Cardiac Surgery and Primary Cardiac Conditions

- E24 Hypertension >69 or w cc
- E25 Hypertension <70 w/o cc
- E26 Congenital or Valvular Disorders >69 or w cc
- E27 Congenital or Valvular Disorders <70 w/o cc
- E28 Cardiac Arrest
- E29 Arrhythmia or Conduction Disorders >69 or w cc
- E30 Arrhythmia or Conduction Disorders <70 w/o cc
- E31 Syncope or Collapse >69 or w cc
- E32 Syncope or Collapse <70 w/o cc
- E33 Angina >69 or w cc
- E34 Angina <70 w/o cc
- E35 Chest Pain >69 or w cc
- E36 Chest Pain <70 w/o cc
- E37 Other Cardiac Diagnoses
- E99 Complex Elderly with a Cardiac Primary Diagnosis

Chapter F - Digestive System

- F01 Oesophagus - Complex Procedures
- F02 Oesophagus - Very Major Procedures
- F03 Oesophagus - Major Procedures or Prostheses
- F04 Oesophagus - Therapeutic Endoscopic or Intermediate Procedures w cc
- F05 Oesophagus - Therapeutic Endoscopic or Intermediate Procedures w/o cc
- F06 Oesophagus - Diagnostic Procedures
- F07 Disorders of the Oesophagus >69 or w cc
- F08 Disorders of the Oesophagus <70 w/o cc
- F11 Stomach or Duodenum - Complex Procedures
- F12 Stomach or Duodenum - Very Major Procedures
- F13 Stomach or Duodenum - Major Procedures >49 or w cc
- F14 Stomach or Duodenum - Major Procedures <50 w/o cc
- F15 Stomach or Duodenum - Therapeutic Endoscopic or Intermediate Procedures
- F16 Stomach or Duodenum - Diagnostic Procedures
- F17 Stomach or Duodenum Disorders >69 or w cc
- F18 Stomach or Duodenum Disorders <70 w/o cc
- F21 Small Intestine - Very Major Procedures
- F22 Small Intestine - Major Procedures >49 or w cc
- F23 Small Intestine - Major Procedures <50 w/o cc
- F24 Small Intestinal Disorders (excluding IBD)
- F31 Large Intestine - Complex Procedures
- F32 Large Intestine - Very Major Procedures

Chapter F - Digestive System

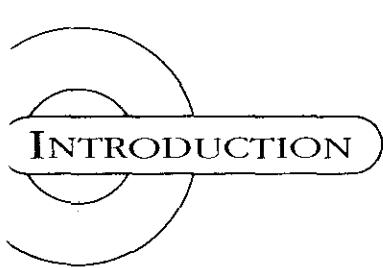

- F33 Large Intestine - Major Procedures w cc
- F34 Large Intestine - Major Procedures w/o cc
- F35 Large Intestine - Endoscopic or Intermediate Procedures
- F36 Large Intestinal Disorders > 69 or w cc
- F37 Large Intestinal Disorders < 70 w/o cc
- F41 General Abdominal - Very Major or Major Procedures > 69 or w cc
- F42 General Abdominal - Very Major or Major Procedures < 70 w/o cc
- F43 General Abdominal - Endoscopic or Intermediate Procedures > 69 or w cc
- F44 General Abdominal - Endoscopic or Intermediate Procedures < 70 w/o cc
- F45 General Abdominal - Diagnostic Procedures
- F46 General Abdominal Disorders > 69 or w cc
- F47 General Abdominal Disorders < 70 w/o cc
- F48 Intestinal Infectious Disorders > 69 or w cc
- F49 Intestinal Infectious Disorders < 70 w/o cc
- F51 Inflammatory Bowel Disease - Complex Procedures
- F52 Inflammatory Bowel Disease - Major Procedures
- F53 Inflammatory Bowel Disease - Endoscopic or Intermediate Procedures > 69 or w cc
- F54 Inflammatory Bowel Disease - Endoscopic or Intermediate Procedures < 70 w/o cc
- F55 Inflammatory Bowel Disease > 69 or w cc
- F56 Inflammatory Bowel Disease < 70 w/o cc
- F61 Gastrointestinal Bleed - Very Major Procedures
- F62 Gastrointestinal Bleed - Major or Therapeutic Endoscopic Procedures
- F63 Gastrointestinal Bleed - Diagnostic Endoscopic or Intermediate Procedures
- F64 Gastrointestinal Bleed > 69 or w cc
- F65 Gastrointestinal Bleed < 70 w/o cc
- F71 Abdominal Hernia Procedures > 69 or w cc
- F72 Abdominal Hernia Procedures < 70 w/o cc
- F73 Inguinal Umbilical or Femoral Hernia Repairs > 69 or w cc
- F74 Inguinal Umbilical or Femoral Hernia Repairs < 70 w/o cc
- F75 Herniotomy Procedures
- F76 Hernia Disorders > 69 or w cc
- F77 Hernia Disorders < 70 w/o cc
- F81 Appendectomy Procedures > 69 or w cc
- F82 Appendectomy Procedures < 70 w/o cc
- F83 Appendix Disorders
- F91 Anus - Major Procedures
- F92 Anus - Intermediate Procedures > 49 or w cc
- F93 Anus - Intermediate Procedures < 50 w/o cc
- F94 Anus - Minor Procedures > 69 or w cc

Chapter F - Digestive System

- F95 Anus - Minor Procedures <70 w/o cc
- F96 Anal Disorders
- F98 Chemotherapy with a Digestive System Primary Diagnosis
- F99 Complex Elderly with Digestive System Primary Diagnosis

Chapter G - Hepato-biliary and Pancreatic System

- G01 Liver Transplant
- G02 Liver - Complex Procedures
- G03 Liver - Very Major Procedures
- G04 Liver - Major Procedures >69 or w cc
- G05 Liver - Major Procedures <70 w/o cc
- G06 Acute Liver Disorders
- G07 Chronic Liver Disorders >69 or w cc
- G08 Chronic Liver Disorders <70 w/o cc
- G11 Biliary Tract - Complex Procedures
- G12 Biliary Tract - Very Major Procedures
- G13 Biliary Tract - Major Procedures >69 or w cc
- G14 Biliary Tract - Major Procedures <70 w/o cc
- G15 Therapeutic Pancreatic or Biliary Procedures
- G16 Diagnostic Pancreatic or Biliary Procedures w cc
- G17 Diagnostic Pancreatic or Biliary Procedures w/o cc
- G18 Biliary Tract Disorders >69 or w cc
- G19 Biliary Tract Disorders <70 w/o cc
- G20 Biliary Tract Neoplasms
- G21 Pancreas - Complex Procedures
- G22 Pancreas - Very Major Procedures
- G23 Pancreatic Disorders
- G24 Chronic Pancreatic Disease >69
- G25 Chronic Pancreatic Disease <70
- G98 Chemotherapy with a Hepato-Biliary or Pancreatic System Primary Diagnosis
- G99 Complex Elderly with a Hepato-Biliary or Pancreatic System Primary Diagnosis

Chapter H - Musculoskeletal System

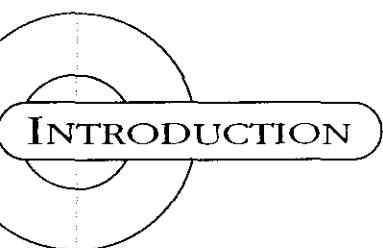

- H01 Bilateral Primary Hip Replacement
- H02 Primary Hip Replacement
- H03 Bilateral Primary Knee Replacement
- H04 Primary Knee Replacement
- H05 Complex Hip or Knee Revisions
- H06 Revisional Procedures to Hips or Knees
- H07 Primary or Revisional Shoulder, Elbow, or Ankle Replacements
- H08 Joint Replacements or Revisions, Site Unspecified
- H09 Anterior Cruciate Ligament Reconstruction
- H10 Arthroscopies
- H11 Foot Procedures - Category 1
- H12 Foot Procedures - Category 2
- H13 Hand Procedures - Category 1
- H14 Hand Procedures - Category 2
- H15 Hand Procedures - Category 3
- H16 Soft Tissue or Other Bone Procedures - Category 1 >69 or w cc
- H17 Soft Tissue or Other Bone Procedures - Category 1 <70 w/o cc
- H18 Soft Tissue or Other Bone Procedures - Category 2 >69 or w cc
- H19 Soft Tissue or Other Bone Procedures - Category 2 <70 w/o cc
- H20 Muscle, Tendon or Ligament Procedures - Category 1
- H21 Muscle, Tendon or Ligament Procedures - Category 2
- H22 Minor Procedures to the Musculoskeletal System
- H23 Soft Tissue Disorders >69 or w cc
- H24 Soft Tissue Disorders <70 w/o cc
- H25 Inflammatory Spine, Joint or Connective Tissue Disorders >69 or w cc
- H26 Inflammatory Spine, Joint or Connective Tissue Disorders <70 w/o cc
- H27 Non-Inflammatory Back, Bone, or Joint Disorders >69 or w cc
- H28 Non-Inflammatory Back, Bone, or Joint Disorders <70 w/o cc
- H29 Congenital Hip Dislocation with Open Procedures
- H30 Infections of Bones or Joints
- H31 Musculoskeletal Signs and Symptoms >69 or w cc
- H32 Musculoskeletal Signs and Symptoms <70 w/o cc
- H33 Neck of Femur Fracture >69 or w cc
- H34 Neck of Femur Fracture <70 w/o cc
- H35 Open Lower Limb Fractures or Dislocations
- H36 Closed Pelvis or Lower Limb Fractures >69 or w cc
- H37 Closed Pelvis or Lower Limb Fractures <70 w/o cc
- H38 Open Upper Limb Fractures or Dislocations
- H39 Closed Upper Limb Fractures or Dislocations >69 or w cc
- H40 Closed Upper Limb Fractures or Dislocations <70 w/o cc
- H41 Sprains, Strains, or Minor Open Wounds >69 or w cc

Chapter H - Musculoskeletal System

- H42 Sprains, Strains, or Minor Open Wounds <70 w/o cc
- H43 Major Cranial, Visceral or Blood Vessel Injury >69 or w cc
- H44 Major Cranial, Visceral or Blood Vessel Injury <70 w/o cc
- H45 Minor Fractures or Dislocations
- H46 Brachial or Lumbar Plexus Injury, or Complex Traumatic Amputations
- H47 Traumatic Amputations
- H48 Other Wounds or Injuries
- H49 Multiple Injury >69
- H50 Multiple Injury <70
- H51 Removal of Fixation Device >69 or w cc
- H52 Removal of Fixation Device <70 w/o cc
- H53 Pathological Fractures or Malignancy of Bone and Connective Tissue >69 or w cc
- H54 Pathological Fractures or Malignancy of Bone and Connective Tissue <70 w/o cc
- H98 Chemotherapy with a Musculoskeletal System Primary Diagnosis
- H99 Complex Elderly with a Musculoskeletal System Primary Diagnosis

Chapter J - Skin, Breast and Burns

- J01 Complex Breast Reconstruction using Flaps
- J02 Major Breast Surgery including Plastic Procedures >49 or w cc
- J03 Major Breast Surgery including Plastic Procedures <50 w/o cc
- J04 Intermediate Breast Surgery >49 or w cc
- J05 Intermediate Breast Surgery <50 w/o cc
- J06 Minor Breast Surgery >69 or w cc
- J07 Minor Breast Surgery <70 w/o cc
- J08 Non-Malignant Breast Disorders
- J09 Malignant Breast Disorders >69 or w cc
- J10 Malignant Breast Disorders <70 w/o cc
- J11 Lymph Dissection Procedures
- J12 Soft Tissue Procedures
- J13 Major Burn >19% TBSA without Significant Graft Procedure >69
- J14 Major Burn >19% TBSA without Significant Graft Procedure >16 <70
- J15 Major Burn >19% TBSA without Significant Graft Procedure <17
- J16 Major Burn >19% TBSA with Significant Graft Procedure >69
- J17 Major Burn >19% TBSA with Significant Graft Procedure >16 <70
- J18 Major Burn >19% TBSA with Significant Graft Procedure <17
- J19 Other Burn with Inhalation Injury
- J20 Other Burn with 1 Significant Graft Procedure >69
- J21 Other Burn with 1 Significant Graft Procedure >16 <70
- J22 Other Burn with 1 Significant Graft Procedure <17

Chapter J - Skin, Breast and Burns

- J23 Other Burn with Multiple Significant Graft Procedures >69
- J24 Other Burn with Multiple Significant Graft Procedures >16 <70
- J25 Other Burn with Multiple Significant Graft Procedures <17
- J26 Other Burn without Significant Graft Procedure >69
- J27 Other Burn without Significant Graft Procedure >16 <70
- J28 Other Burn without Significant Graft Procedure <17
- J29 Major Reconstructive Surgery
- J30 Major Skin Procedures >49 or w cc
- J31 Major Skin Procedures <50 w/o cc
- J32 Intermediate Skin Procedures
- J33 Minor Skin Procedures - Category 3
- J34 Minor Skin Procedures - Category 2 w cc
- J35 Minor Skin Procedures - Category 2 w/o cc
- J36 Minor Skin Procedures - Category 1 w cc
- J37 Minor Skin Procedures - Category 1 w/o cc
- J38 Skin Ulcers
- J39 Major Dermatological Conditions >69 or w cc
- J40 Major Dermatological Conditions <70 w/o cc
- J41 Major Skin Infections >69 or w cc
- J42 Major Skin Infections <70 w/o cc
- J43 Major Skin Tumours
- J44 Minor Dermatological Conditions or Benign Tumours
- J45 Minor Skin Infections
- J98 Chemotherapy with a Skin, Breast or Burn Primary Diagnosis
- J99 Complex Elderly with a Skin, Breast or Burn Primary Diagnosis

Chapter K - Endocrine and Metabolic System

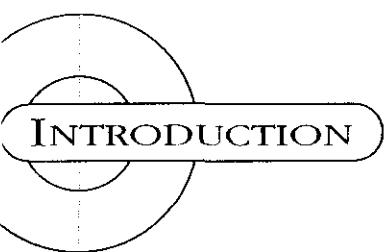

- K01 Thyroid Procedures
- K02 Parathyroid Procedures
- K03 Adrenal Procedures
- K04 Anterior Pituitary Disorders
- K05 Other Endocrine Disorders >69 or w cc
- K06 Other Endocrine Disorders <70 w/o cc
- K07 Fluid or Electrolyte Disorders >69 or w cc
- K08 Fluid or Electrolyte Disorders <70 w/o cc
- K09 Disorders of Nutrition
- K10 Inborn Errors of Metabolism
- K11 Diabetes with Hypoglycaemic Emergency >69 or w cc
- K12 Diabetes with Hypoglycaemic Emergency <70 w/o cc

Chapter K - Endocrine and Metabolic System

- K13 Diabetes with Hyperglycaemic Emergency >69 or w cc
- K14 Diabetes with Hyperglycaemic Emergency <70 w/o cc
- K15 Diabetes and Other Hyperglycaemic Disorder >69 or w cc
- K16 Diabetes and Other Hyperglycaemic Disorder <70 w/o cc
- K17 Diabetes with Lower Limb Complications
- K98 Chemotherapy with an Endocrine or Metabolic System Primary Diagnosis
- K99 Complex Elderly with an Endocrine or Metabolic System Primary Diagnosis

Chapter L - Urinary Tract and Male Reproductive System

- L01 Kidney Transplant
- L02 Kidney Major Open Procedure >49 or w cc
- L03 Kidney Major Open Procedure <50 w/o cc
- L04 Kidney Major Endoscopic Procedure
- L05 Kidney Intermediate Endoscopic Procedure >69 or w cc
- L06 Kidney Intermediate Endoscopic Procedure <70 w/o cc
- L07 Non OR Admission for Kidney or Urinary Tract Neoplasms >69 or w cc
- L08 Non OR Admission for Kidney or Urinary Tract Neoplasms <70 w/o cc
- L09 Kidney or Urinary Tract Infections >69 or w cc
- L10 Kidney or Urinary Tract Infections <70 w/o cc
- L11 Ureter Open Procedure
- L12 Ureter Major Endoscopic Procedure
- L13 Ureter Intermediate Endoscopic Procedure
- L14 Bladder Major Open Procedures or Reconstruction
- L15 Cystectomy or Urinary Diversion excluding Reconstruction
- L16 Bladder Intermediate Open Procedure
- L17 Bladder Major Endoscopic Procedure
- L18 Bladder Intermediate Endoscopic Procedure w cc
- L19 Bladder Intermediate Endoscopic Procedure w/o cc
- L20 Bladder Minor Endoscopic Procedure w cc
- L21 Bladder Minor Endoscopic Procedure w/o cc
- L22 Bladder or Urinary Mechanical Problems >69 or w cc
- L23 Bladder or Urinary Mechanical Problems <70 w/o cc
- L24 Ureteric or Bladder Disorders
- L25 Prostate or Bladder Neck Open Procedure (Male and Female) >69 or w cc
- L26 Prostate or Bladder Neck Open Procedure (Male and Female) <70 w/o cc
- L27 Prostate Transurethral Resection Procedure >69 or w cc
- L28 Prostate Transurethral Resection Procedure <70 w/o cc
- L29 Prostate or Bladder Neck Intermediate Endoscopic Procedure (Male and Female)

Chapter L - Urinary Tract and Male Reproductive System

- L30 Prostate or Bladder Neck Minor Endoscopic Procedure (Male and Female)
- L31 Malignant Prostate Disorders
- L32 Non-Malignant Prostate Disorders
- L33 Urethra Major Open Procedure
- L34 Urethra Intermediate or Minor Procedures > 69 or w cc
- L35 Urethra Intermediate or Minor Procedures < 70 w/o cc
- L36 Urethra Disorders
- L37 Penis Major or Intermediate Open Procedures
- L38 Penis Minor Open Procedure > 69 or w cc
- L39 Penis Minor Open Procedure < 70 w/o cc
- L40 Penis Disorders
- L41 Vasectomy Procedures
- L42 Scrotum Testis or Vas Deferens Major Open Procedure > 69 or w cc
- L43 Scrotum Testis or Vas Deferens Major Open Procedure < 70 w/o cc
- L44 Scrotum Testis or Vas Deferens Disorders
- L45 Extracorporeal Lithotripsy
- L46 Renal Replacement Associated Procedures
- L47 Renal Replacement Therapy w cc
- L48 Renal Replacement Therapy w/o cc
- L49 Acute Renal Failure > 69 or w cc
- L50 Acute Renal Failure < 70 w/o cc
- L51 Chronic Renal Failure
- L52 Renal General Disorders > 69 or w cc
- L53 Renal General Disorders < 70 w/o cc
- L54 Renal Findings > 69 or w cc
- L55 Renal Findings < 70 w/o cc
- L98 Chemotherapy with a Urinary Tract or Male Reproductive System Primary Diagnosis
- L99 Complex Elderly with a Urinary Tract or Male Reproductive System Primary Diagnosis

Chapter M - Female Reproductive System

- M01 Lower Genital Tract Minor Procedures
- M02 Lower Genital Tract Intermediate Procedures
- M03 Lower Genital Tract Major Procedures
- M04 Lower Genital Tract Complex Major Procedures
- M05 Upper Genital Tract Minor Procedures
- M06 Upper Genital Tract Intermediate Procedures
- M07 Upper Genital Tract Major Procedures
- M08 Upper Genital Tract Complex Major Procedures

Chapter M - Female Reproductive System

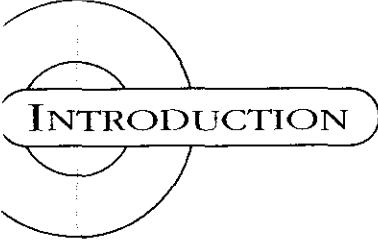

- M09 Threatened or Spontaneous Abortion
- M10 Surgical Termination of Pregnancy
- M11 Medical Termination of Pregnancy
- M12 Non-Surgical Treatment of Lower Genital Tract Disorders
- M13 Non-Surgical Treatment of Genital Prolapse or Incontinence
- M14 Non-Surgical Treatment of Fibroids, Menstrual Disorders, or Endometriosis
- M15 Non-Surgical Treatment of Ovary, Tube, or Pelvis Disorders
- M16 Non-Surgical Treatment of Gynaecological Malignancy >69 or w cc
- M17 Non-Surgical Treatment of Gynaecological Malignancy <70 w/o cc
- M18 Non-Surgical Treatment of Other Gynaecological Conditions
- M19 Gynaecological Radiotherapy
- M98 Chemotherapy with a Female Reproductive System Primary Diagnosis
- M99 Complex Elderly with a Female Reproductive System Primary Diagnosis

Chapter N - Obstetrics and Neonatal Care

- N01 Neonates - Died <2 days old
- N02 Neonates with Multiple Minor Diagnoses
- N03 Neonates with one Minor Diagnosis
- N04 Neonates with Multiple Major Diagnoses
- N05 Neonates with one Major Diagnosis
- N06 Normal Delivery w cc
- N07 Normal Delivery w/o cc
- N08 Assisted Delivery w cc
- N09 Assisted Delivery w/o cc
- N10 Caesarean Section w cc
- N11 Caesarean Section w/o cc
- N12 Other Maternity Events

Chapter P - Diseases of Childhood

- P01 Asthma or Recurrent Wheeze
- P02 Cystic Fibrosis
- P03 Upper Respiratory Tract Disorders
- P04 Lower Respiratory Tract Disorders
- P05 Major Infections (including Immune Disorders)
- P06 Minor Infections (including Immune Disorders)
- P07 Neoplasms
- P08 Febrile Convulsions

Chapter P - Diseases of Childhood

- P09 Major Nervous System Disorders
- P10 Other Nervous System Disorders
- P11 Endocrine Disorders (including Diabetes)
- P12 Major Gastrointestinal or Metabolic Disorders
- P13 Other Gastrointestinal or Metabolic Disorders
- P14 Ingestion Poisoning or Allergies
- P15 Accidental Injury
- P16 Child Welfare and Protection
- P17 Behavioural Disorders
- P18 Psychiatric Disorders
- P19 Major Congenital Conditions
- P20 Other Congenital Conditions
- P21 Renal Disease
- P22 Renal Disease with Renal Failure
- P23 Blood Cell Disorders
- P24 Skin, Musculoskeletal, or Connective Tissue Disorders
- P25 Cardiac Conditions
- P98 Chemotherapy with a Disease of Childhood Primary Diagnosis

Chapter Q - Vascular System

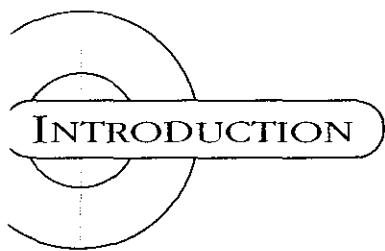

- Q01 Emergency Aortic Surgery
- Q02 Elective Abdominal Vascular Surgery
- Q03 Lower Limb Arterial Surgery
- Q04 Bypasses to Tibial Arteries
- Q05 Extracranial or Upper Limb Arterial Surgery
- Q06 Miscellaneous Major Vascular Procedures
- Q07 Miscellaneous Intermediate or Minor Vascular Procedures
- Q08 Procedures on the Spleen
- Q09 Procedures on the Lymphatic System w cc
- Q10 Procedures on the Lymphatic System w/o cc
- Q11 Varicose Vein Procedures
- Q12 Therapeutic Endovascular Procedures
- Q13 Diagnostic Radiology - Arteries or Lymphatics w cc
- Q14 Diagnostic Radiology - Arteries or Lymphatics w/o cc
- Q15 Amputations
- Q16 Foot Procedures for Diabetes or Arterial Disease, and Procedures to Amputation Stumps
- Q17 Peripheral Vascular Disease >69 or w cc
- Q18 Peripheral Vascular Disease <70 w/o cc
- Q98 Chemotherapy with a Vascular System Primary Diagnosis
- Q99 Complex Elderly with a Vascular System Primary Diagnosis

Chapter R - Spinal Surgery and Primary Spinal Conditions

- R01 Minor Spinal Procedures
- R02 Surgery for Degenerative Spinal Disorders
- R03 Spinal Fusion or Decompression Excluding Trauma
- R04 Vertebral Column Injury with Fusion or Decompression
- R05 Vertebral Column Injury without Procedure >69 or w cc
- R06 Vertebral Column Injury without Procedure <70 w/o cc
- R07 Spinal Cord Injury with Fusion or Decompression
- R08 Spinal Cord Injury without Procedure
- R09 Revisional Spinal Procedures
- R10 Surgery for Scoliosis or Other Spinal Deformity
- R11 Spinal Cord Surgery
- R12 Cervical Spinal Disorders >69 or w cc
- R13 Cervical Spinal Disorders <70 w/o cc
- R14 Spinal Tumours
- R15 Thoracic or Lumbar Spinal Disorders >69 or w cc
- R16 Thoracic or Lumbar Spinal Disorders <70 w/o cc
- R17 Non-Traumatic Spinal Cord Disorders
- R18 Scoliosis or Other Spinal Deformity
- R98 Chemotherapy with a Spinal Primary Diagnosis
- R99 Complex Elderly with a Spinal Primary Diagnosis

Chapter S - Haematology, Infectious Diseases, Poisoning and Non-specific Groupings

- S01 Haematological Disorders with Minor Procedure
- S02 Malignant Disorders of Lymphatic or Haematological Systems w cc
- S03 Malignant Disorders of Lymphatic or Haematological Systems w/o cc
- S04 Coagulation Disorders
- S05 Red Blood Cell Disorders >69 or w cc
- S06 Red Blood Cell Disorders <70 w/o cc
- S07 Other Haematological or Splenic Disorders w cc
- S08 Other Haematological or Splenic Disorders w/o cc
- S09 Bone Marrow Graft
- S10 Disorders of Immunity with HIV/AIDS
- S11 Disorders of Immunity without HIV/AIDS
- S12 Septicaemia
- S13 Pyrexia of Unknown Origin
- S14 Other Viral Illness
- S15 Other Non-Viral Infections
- S16 Poisoning, Toxic Effects, or Overdoses
- S17 Side Effects of Drugs

Chapter S - Haematology, Infectious Diseases, Poisoning and Non-specific Groupings

- S18 Environmental Injury
- S19 Complications of Treatment
- S20 Postoperative infection
- S21 Convalescent or Other Relief Care
- S22 Planned Procedures Not Carried Out
- S23 Rehabilitation
- S24 Holiday Relief Care
- S25 Other Admissions
- S98 Chemotherapy with a Haematology, Infectious Disease, Poisoning, or Non-specific Primary Diagnosis
- S99 Complex Elderly with a Haematology, Infectious Disease, Poisoning, or Non-specific Primary Diagnosis

Chapter T - Mental Health

- T01 Senile Dementia
- T02 Schizophreniform Psychoses with Section
- T03 Schizophreniform Psychoses without Section
- T04 Mania with Section
- T05 Mania without Section
- T06 Depression with Section
- T07 Depression without Section
- T08 Presenile Dementia
- T09 Anxiety Syndromes
- T10 Alcohol or Drugs Non-Dependent Use > 16
- T11 Alcohol or Drugs Non-Dependent Use < 17
- T12 Alcohol or Drugs Dependency
- T13 Eating Disorders or Obsessive Compulsive Disorders
- T14 Acute Reactions or Personality Disorders
- T15 Childhood Non-Psychotic Disorders
- T16 Mental Retardation
- T17 Specific Learning Disabilities

Chapter U - Undefined Groups

- U01 Invalid Primary Diagnosis
- U02 Invalid Dominant Procedure
- U04 Age Outside Range 0-130
- U05 Age Conflicting with Diagnosis
- U07 Poorly Coded Primary Diagnosis
- U08 Poorly Coded Dominant Procedure
- U09 Invalid Length of Stay
